Key Accomplishments

- Architected and delivered a company-wide batch production record (BPR) system used by warehouse teams, digitizing operational reporting and improving traceability, accuracy, and process oversight.
- Led the evaluation and company-wide rollout of a version control, improving collaboration, repository governance, and development workflow consistency.
- Led enhancements to a property management reservation platform for a real estate client, improving booking accuracy, operational visibility, and day-to-day workflow efficiency.
- Mentored and guided junior developers on live client projects, conducting code reviews and providing architectural direction to support their growth into production-ready engineers.

Development Experience

DFW Software Consulting | Full Stack Developer (Lead | Founder) | 1.2023 – Present

- Lead **end-to-end project delivery** — client discovery, system architecture, development, deployment, and post-launch support
- Architect and build **full-stack applications** using **React, Next.js, Node.js, FastAPI, and PostgreSQL**, focused on performance, scalability, and maintainability
- Develop **client-facing dashboards, booking systems, and operational tools** that replace manual workflows and improve business efficiency
- Design and deploy **Dockerized production environments** with **NGINX, reverse proxies, and Linux servers**, ensuring reliable hosting and secure infrastructure

Onix Media | Full Stack Software Developer: (Full Stack) | 10.2024 - 3.2026

- Managed Linux-based production environments, handling NGINX, reverse proxy configs, and deployment optimization for performance, uptime, and scalability managing Apache/NGINX configurations for high availability, performance, and scalability.
- Modernization of legacy web platforms, migrating WP applications to React + TypeScript, improving maintainability, performance, and onboarding for new developers
- Engineered RESTful APIs and automation systems with Node.js and FastAPI, integrating SQL databases to streamline content publishing and internal data workflows
- Implemented third-party integrations including Stripe, WordPress, and ShipStation APIs, supporting e-commerce operations and automated fulfillment processes

Skills & Strengths

Technology & Tools | NodeJS, NextJS, React, JavaScript, Typescript, **Stripe**, MongoDB, Redux, PSQL, Github, Tailwind
